The use of the Five
former Tables.

For the first if you would know
to how much one pound stock a-
mounts at Interest upon Interest
in any number of years not ex-
ceeding 31. Seek the number of
years in the first Colume towards
your left hand, under this word
years, and there directly against
the same you shall see the sum
desired.

Example.

To know how much in-
terest upon 1 l. stock a-
mounts at interest upon in-
terest in 21. years, look 21
under the word years, and
directly against the same
you shall see 5 l. 0 s. 8 d.
which is the sum desired :
Again to know how much
10 l. stock in the same time,
multiply the same by 10,
or adde the same 10 toge-
ther, which makes 50 l.
6 s. 8 d. which is also the
sum me desired : And thus
may you work upon any
sum desired in any of the
other 4 columes observing
the manner as is before,
as the propositions nomi-
nated in the head of each
colume doe direct.

The use and explanation of this Table.

It is calculated for 30 yeeres; the first columnne whereof towards the left hand sheweth the yeeres of a Lease; and right against each yeere on the right hand is the number of the yeeres; quarters; and half quarters or yeeres purchase that such a lease is worth.

Example:

Suppose there be a Lease to be sold to endure for 13 yeeres so some and you would know how many yeeres purchase it is worth.

Look in the table under the titles of yeeres of a Lease for 13 and right against it on the right hand you shall finde 7 yeeres 3 quarters and a half quarter of a yeeres purchase; the value of such a Lease within an eighth part of a yeeres rent; which is the nearest value that I have calculated this table unto, in regard of the omission of many fractions that would arise.
